

The next chapter of Grand County Library District:

A simple guide to the two ballot measures impacting our libraries

6b. Keep the temporary 0.95 mill levy approved in 2016, which expires at the end of 2026.

A “YES” VOTE MEANS:

The Library District’s total mill levy will remain at the current 3.36 mills.

Will this change my tax rate?

- **No.** This keeps library taxes the same as the past ten years.

How will the funds be used?

- Maintain safe, comfortable, clean spaces to meet, study, work, & read
- Keep current level of resources: physical & digital books, audiobooks, streaming services, Library of Things, and Access Grand recreational & cultural passes

A “NO” VOTE MEANS:

The Library District’s total mill levy will be reduced by 28%, to 2.41 mills.

How would a 28% reduction impact the Library?

It would limit our ability to address:

- Needed repairs
- Maintenance
- Facility improvements
- Long-term sustainability of library services and facilities

Based on the median Grand County home value, the 0.95 mill levy costs approx. \$48/year, or \$4/month.

6c. Waive Colorado's 5.25% annual property tax revenue growth limit.

A "YES" VOTE MEANS:

The Library District can retain and use all of the revenue generated by its existing voter-approved tax rate.

Does this create a new tax?

No. This ballot question does not create a new tax or change the Library District's mill levy rate.

How would funds be used?

This would increase services according to growth and allow the Library to better prepare for long-term facility maintenance & improvements.

Why is a waiver needed if voters approve the Library's 0.95 mill levy?

The mill levy determines the Library's tax rate. The 5.25% revenue cap is a separate state requirement that may limit how much property tax revenue the Library District can retain each year. This ballot question asks voters whether the district may retain revenue above that cap if annual revenue growth exceeds 5.25%.

A "NO" VOTE MEANS:

The Library District is limited to 5.25% property tax growth annually, regardless of actual growth.

What if this doesn't pass?

- Restricts facility improvements
- Slows operational growth as demand for services increases
